

# MINDSYSTEMS AMODE<sup>®</sup>

## Version 2

The smart all-in-one information management solution  
Info Management | Visual ThoughtMaps | Project Plans

## Release Notes:

### Mindsystems Amode V1: Build 2010

#### Release Date: 7th Aug 2009

- Topic Numbering – Accessed from the Home Tab, this provides visual topic numbering and also works by syncing numbering with Word, Excel, KnowledgeLink and MindManager import/export. Check F1 Help for more info on this feature (Topic: Mindsystems Amode Help > System Functions > Numbering).
- Recalculate Dates - The Recalculate Dates function allows you to readjust a project(s) to have a new start date. This function requires some understanding, again check F1 Help (Topic: Mindsystems Amode Help > System Functions > Recalculate Dates).
- Currency Symbols – Currency symbols for many major currencies can now be set in 'Main Menu > Options > Localization'. This effects items such as Gantt Mode and export Quotes.
- Copy Percentages – Percentage completed are now copied when you copy and paste a topic.
- Templates Interface – Panel depth changed to 50/50 to allow more usable space for personal templates.
- Plus/Minus and Line Definitions – Plus/Minus icons and lines have been increased in size to add visual clarity.
- Calendar Icon on Tree – In Tree Mode a topic is piece of free form information, anything you like. In Calendar Mode this translates to a task on the Calendar. To show the relationship between these two, when you create a new task in Calendar Mode (right click), a icon is show next to the corresponding topic in Tree Mode to indicate this is on the Calendar. When you hover over the icon it shows details and if you click on it you are taken to the Calendar area.
- Gantt Mode / Master Resources Setup – After setting up a new resources in 'Project Tools > Master Resources', you are now prompted to return to the topic you originally came from (as the next logical step is to assign the resource to the task) to save navigating back through interface.
- Gantt Mode – The Task Titles on the far left now have click selection implemented. Single click focuses that tasks information into the right hand 'Timeline Control' panel and double click allows you to edit name. you can also use all normal create and move functions from the Home tab or via shortcut keys.
- Core Rendering Enhancement – Amode's backend control has been readjusted to produce faster performance gain of approximately 25% working with tree's larger than 100 branches.
- Spell Check Speed – A new spell check control has been designed and implemented to increase the processing and checking speed.
